The undersigned customer agrees to pay the Total Annual Charge listed above, to be billed per the Billing Plan selected above, and to be reflected on the electric bill(s) of the account number(s) listed above. Charges for the service will appear on the customer's next on-cycle electric bill. The Service Term is for one year. Service will be automatically renewed unless a written termination request from the customer is received by Granite State Electric, doing business as National Grid, at least 30 days prior to the end of the Service Term. If this contract is canceled prior to the end of the Service Term, the customer's account(s) will be charged for the difference between the Total Annual Charge listed above and the total amount that has been billed to date applicable to the Service Term.

The customer acknowledges that the billing charges listed above are determined pursuant to the Optional Interval Data Service Provision approved by the New Hampshire Public Utilities Commission (Commission). The Optional Interval Data Service Provision may change from time to time, but any changes must be approved by the Commission. In the event that the fees reflected in the tariff change, National Grid will notify the customer of any new fees that will be in effect at the beginning of the next Service Term, but National Grid will continue to bill the charges listed above until the completion of the current Service Term. If National Grid does not receive a written termination request from the customer at least 30 days prior to the end of the current Service Term, National Grid will bill, and the customer agrees to pay, the new fees for the next Service Term, determined pursuant to the new annual charge approved by the Commission.
