Re : OASIS Posting – National Grid Affiliate

Schedule 25 of the ISO-NE Tariff requires Interconnecting Transmission Owners to post on OASIS an advance notice of its intent to participate in a Scoping Meeting with an Interconnection Customer that is also an Affiliate.

Accordingly, National Grid is posting this notice regarding a Scoping Meeting which took place on January 31, 2017 for Q627 Granite State Power Link with an affiliate, Grid America Holdings Inc., the NYISO, ISO-NE, VELCO, Eversource, New Hampshire Transmission, LLC, Hydro Québec, and Green Mountain Power. Due to an administrative oversight, National Grid did not post this notice in advance of the meeting; however, when the Company became aware of the oversight it promptly made this posting.
