

Request for Proposal (RFP) in Western New York

On October 24, 2012, National Grid issued a request for proposal (RFP) for potential reliability solutions in Western NY for the period beginning June 1, 2013 to address system security concerns associated with the mothball of Dunkirk Power LLC. The target area for the reliability resources consists primarily of Chautauqua and Cattaraugus Counties and the southern portion of Erie County. National Grid will be considering proposals individually and in combination with other proposals, so proposals that only partially fulfill the needs can be offered for consideration. Responses to the RFP are due December 14, 2012. For more information, contact Duane Morgan at 315-428-6843 or Duane.Morgan@nationalgrid.com.
