

Reynolds Avenue Substation and Distribution Upgrades

Rehoboth, MA | 2025

To address reliability issues and to meet growing electric demand, a new substation will be built on Reynolds Avenue in Rehoboth. To incorporate the new substation, upgrades are required to much of the existing electric distribution system.

Project details:

The Reynolds Avenue Project includes a new substation located on Reynolds Avenue in Rehoboth as well as upgrades to the local electric distribution system. Constructing a new substation and upgrades to both existing overhead (poles and wires) and underground electric distribution systems will improve service to the community.

What to expect during construction:

- **Residents can anticipate increased activity** and deliveries to and from the new substation location on Reynolds Avenue as well as work within the public streets throughout Rehoboth, Dighton, and Attleboro. This includes increased personnel presence, equipment utilization, as well as traffic restrictions in certain areas during active activities.
- **Restoration** of any disturbed roadway/sidewalk areas.
- **Direct contact with our outreach team.** If you have questions or concerns, please call or email our team.
