

Update on construction in your neighborhood

Forest Hills Reliability Project, Metropolitan Avenue | August 06, 2026

Dear Neighbor,

As work on the Forest Hills Reliability Project continues, we appreciate your patience as we make important upgrades to the local energy system. These improvements are designed to strengthen system reliability and help ensure safe, dependable energy service for homes and businesses within the community.

Through August, driveway access for residents on 74th Avenue and 72nd Drive near Ascan Avenue and Metropolitan Avenue will be impacted during work hours, Monday through Saturday from 9AM to 3PM*.

We understand this is an inconvenience as street parking availability is limited. If you anticipate needing your vehicle during construction work hours, we encourage you to park on the street whenever possible. This helps our crews avoid repeated re-plating of excavations, which can slow progress and stall construction in the area. If you require access to your driveway during construction, please speak with a crew member or traffic flagger on site. **Emergency access will be accommodated as quickly and safely as possible.**

Traffic on Metropolitan Avenue will remain **eastbound only**. Parking on both sides of Metropolitan Avenue will be impacted during construction. Paid parking meters are still in effect except for the meters within active construction zones.

We thank you for your patience and are committed to completing this work safely and efficiently while minimizing disruptions whenever possible. Construction is currently scheduled to pause November 15, 2026, for the winter season and resume in Winter 2027 to complete the remaining installations along Metropolitan Avenue toward 70th Drive. For questions, please contact our Project Engagement Team using the information below.

For your safety, please follow posted traffic signs and never enter active work zones. Thank you for your patience and understanding as we complete this important work.

**Work hours are subject to change based on weather and field conditions.*

Sincerely,

National Grid Project Engagement Team
