

Community Update: Greenpoint Saltwater Pump House (SWPH) Resiliency Project

Greenpoint Community:

We wanted to share an update on work at the Greenpoint facility located on Vandervoort Avenue between Lombardy Street and Maspeth Avenue.

Project Review:

As you may be aware, National Grid has been working to update the saltwater pump house (SWPH) located within the footprint of the Greenpoint Energy Center since the spring 2022. The SWPH is a required supplemental fire suppression system to serve as part of the overall Greenpoint Energy Center fire protection system. This is a resiliency project which will include replacing the existing SWPH with a new, elevated facility. As part of the company's net zero commitment to reduce its own emissions, the facility will include solar panels on the roof to supplement electricity for the building.

This is a multi-stage resiliency project. The new SWPH is in the early stages of design and permitting and is scheduled for full commission early 2025. The first stage is site preparation -- demolition of a vacant operations building is underway. This work is expected to be completed in the Fall 2022. Updates will be provided as the project progresses.

Stage I: Demolition of the Vacant Building (See map for location)

For reference, the Accommodations Building at the Greenpoint facility was built in the early 1920s and has been vacant for many years. The building is scheduled to be demolished according to the schedule provided below. Demolition of this building is being performed now in preparation for the future SWPH replacement project. More information about ongoing activities will be provided as it is available.

Demolition Begins: August 2022

Anticipated Completion: January 2025

*Schedule subject to change

Project Work Zone

Safety is our top priority during construction.

Please know National Grid and its contractors will remain vigilant by continuing to adhere to all COVID-19 safety guidelines set by the CDC, New York State, and our local permitting authorities, protecting our employees, customers, and the public.

Smell gas. Act fast . Gas Emergency?

Move your family and pets to a safe area outside and **call 911** and alert National Grid's gas emergency contact number **1-718-643-4050** immediately. Never assume someone else will call.
