

# Mortimer – Pannell Rebuild Project

Upcoming Corridor Activities | Fall 2022

The Mortimer – Pannell Rebuild Project is an approximately 16-mile 115kV electric transmission line rebuild in Monroe County, NY. The project will replace aging transmission infrastructure, enhancing the electric grid in Western New York.

## Team Field Review

Our project team is planning to review the project right-of-way (ROW) in person this fall. The reviews will take about one day each, but could be extended due to weather, team needs, etc. The reviews are non-invasive, and the ROW will be accessed by foot and/or light duty vehicles. Reviews of possible construction access roads and marshalling yards will also take place this fall in the area. Prior to the field reviews, the ROW will be mowed and staked; as a result, you may see stakes or flags in the ROW.

## Geotechnical Investigations

This fall, our contractors will begin geotechnical investigations in the ROW. This involves staking proposed structure locations and crews taking soil bore samples to be used in engineering design. As with the field review, the ROW will need to be mowed prior to the work being done. After samples are taken, the holes will be backfilled with the same soils.

## Safety Information

Our staff and contractors are required to carry photo IDs. Please stay clear of equipment and any active field work in the corridor. If you have any questions, please contact us at the information listed.

## Schedule Updates & Next Steps

Our project team will continue to study the project corridor as design progresses. As the project moves closer to the active permitting stage, more information will be provided to our neighbors on the project design, location, timeline, and how to participate in the permitting process.

Schedule updates will be available on our project website, or you may also contact us at **585-440-0446**. Thank you for your understanding as we continue to improve our electric infrastructure in Western New York.

## Quick Project Facts:

- What:** Approx. 16-mile 115kV electric transmission line rebuild
- Where:** Monroe County, NY: Towns of Brighton, Henrietta, Pittsford, and Perinton
- Phase:** Field investigations and design
- When:** Proposed construction start in 2027
