

Important project updates and information

NL-05 Regulator Station Massapequa, NY

November 2022

Dear Neighbor,

We are writing to let you know that the construction project in your area will be finishing its last stages of work for this year.

Due to the critical nature of this work and the need to complete work prior to the winter heating season, we will be pausing the project until the spring of 2024 (after winter heating season). This decision was made to provide safe and reliable service for the winter heating season. Over the coming weeks our crews will be finishing restoring the impacted areas and securing the station for winter usage.

The restoration will take place on Clark Avenue between Hicksville Road and Forest Avenue.

We understand the impact caused by this project to your neighborhood. Our crews are doing everything possible for a timely completion of the work and restoration of disturbed areas. We thank you for your patience during this time.

For questions, concerns, or more information about this project, please contact us at the number or email below.

Thank you,

National Grid Stakeholder Management
