Update on activities in your neighborhood

Riverhead Facility Upgrade | May 2026

Dear Neighbor,

Over the past year, we have upgraded our Riverhead Energy Facility to enhance the facility's ability to support local energy needs. These improvements will strengthen the facility's ability to continue supporting our neighbors during the peak winter months.

During the week of May 17, 2026, you may notice a temporary natural gas odor during our preparation activities. This is part of a testing process to ensure the facility is operating efficiently.

However, if you smell gas, please call 631-861-2850 or 9-1-1 so it can be checked right away.

Once this preparation work is complete, starting the week of June 8th, 2026, we will be conducting routine operational testing at the site. This testing helps confirm the upgraded equipment is working as designed before being placed into regular service. You may notice an increase in truck activity during testing periods. These operations are closely coordinated with local agencies and emergency services.

What to expect during testing:

Eight trucks will arrive at the facility at night and connect to the upgraded stations. These trucks will safely transfer energy into the facility so it can be delivered through the local system and serve customers throughout Long Island. Traffic flaggers will assist trucks in and out of our facility on Mill Road.

If you have questions or would like additional information, please visit our project specific website at www.ngrid.com/rfu or contact our project team below.

Thank you for your understanding as we work to complete these important upgrades in your community.

Sincerely,

National Grid Project Team
