Update on work in your neighborhood

May 26, 2022

Dear Neighbor,

We're writing to update you about ongoing work in your neighborhood. This winter we began installing an upgraded regulator station on Montauk Hwy in order to retire the existing regulator station on Old Riverhead Rd E. The project increases reliability, service, and retires an older station that will be beyond its capacity. We are currently on schedule to lighten our crews after Memorial Day weekend to assist in traffic as the summer months arrive. We have outlined more details concerning schedule and restoration of the impacted area below:

Summer Schedule:

Our plan is to institute intermittent schedules to assist in traffic during summer months. During the summer months we may continue light work at the site, though that work will not require shifting traffic lanes. We are continuing light work in order to remain on schedule to complete the project. Only if required, we may perform work at night to lessen impact to traffic. After Labor Day we will return to working days to complete the installation by Winter 2022. Once the new Regulator Station on Montauk Hwy is fully operational, we will retire the existing Regulator station on Old Riverhead Rd E, during Spring 2023.

Restoration of Area:

We will be temporarily restoring the work area throughout the coming months. Please note, this is not final restoration. The restoration you will see during the summer and fall months are not final, but the temporary restoration of the first phase of this project. We will complete final restoration of the entire area once the project is fully complete in the spring of 2023.

As always, our crews will work to minimize any impacts to the community, including parking throughout the neighborhood. For your safety, please do not enter work zones and be mindful of work zones during and after construction hours.

Thank you,
