Guard against scam artists, impersonators.

Be alert for scam artists and imposters posing as utility employees who may try to gain access to sensitive account information or attempt to gain entry to your home.

Recently, we have received isolated reports that some energy salespeople have been presenting themselves as National Grid employees. These representatives are not from National Grid. The company does not conduct sales door-to-door or over the phone, nor does it offer residential equipment inspection and maintenance service.

Customers may receive solicitations from alternate energy suppliers with offers to purchase electricity on their behalf at a lower price. National Grid encourages customers to be wise consumers and consider all available energy supply options at www.ngrid.com/masschoice

An alternate electricity supplier is an option for our customers to consider, but please read the fine print. And whether you choose an alternate supplier or not, National Grid will deliver your electricity safely and reliably, respond to service and emergency needs, and restore power during storms.

Please keep these safety tips in mind:

- Every National Grid employee and all contractors doing work for us, carry a photo ID card. If someone requesting entry into your home or business does not show an ID card, don't let them in and please call Customer Service at **1-800-322-3223**. If you feel you are in immediate danger, call **911**.
- We do call customers with outstanding balances, requesting payment and notifying of the potential for service interruption (due to non-payment). However, we do not accept pre-paid debit cards for payment and would never ask a customer to acquire one of these cards to make a bill payment.
- If you are in doubt that a caller is from National Grid, ask them to verify their identity by providing the last five digits of your account number. **DO NOT** give the caller your account number.

Plant a tree to celebrate Arbor Day. But call before you dig!

April 29 is Arbor Day, the annual observance that celebrates the role of trees in our lives. Celebrate the day by planting a tree – it can add value to your home and help to reduce energy costs!

Before digging

Before any planting or home improvement project that requires digging, please remember to first call **811** so the location of underground utility lines can be marked. It's a free service, and it's the law.

To provide shade in summer, yet let the sun's warmth in during winter, plant deciduous trees (trees that shed leaves in fall) such as maples, oaks, birch, locusts, lindens on the east and south sides of your home.

Look up

When planting a tree, remember to look up to determine where your tree will be located in relation to overhead utility lines. Proper tree species selection and placement will avoid utility line conflicts and costly pruning requirements in the future. For advice on the right varieties of trees and shrubs for your yard, visit your local nursery or www.nationalgridus.com for a planting guide.

Stay connected. Stay informed.

We offer a number of ways to stay connected before, during and after a major storm. National Grid sends text messages out to customers during major storms. You can receive important safety tips, contacts and more. Text the word **STORM** to **NGRID (64743)*** to sign up.

For up-to-date information, photos, safety tips and more, find us on Facebook, Twitter and Instagram.

*We do not charge customers for text alerts, but normal message and data rates may apply based on your mobile carrier plan. You can opt out by texting the word **STOP** to **NGRID (64743)**.

Use an authorized agency when paying your bill in person.

If you pay your National Grid bill in person, be sure to use an authorized payment agency to ensure that payments are made on a timely basis, and that your account is being credited properly.

Know before you go. Contact the payment agent and ask:

- Do they accept payments for National Grid bills?
- What form of payment do they accept?
- Are there dollar limits or any service fees?

Tips for working safely outdoors.

The spring thaw means turning our attention to home and garden projects. Keep safety in mind when heading outdoors.

- Overhead power lines are not insulated, and carry enough energy to cause serious injury or even death. Regard all wires as live.
- Stay at least 10 feet away from residential electric lines and equipment.
- Look up and keep ladders at least 10 feet away from power lines when carrying, moving, and raising them.
- Keep away from wires when working with tools, pipe, lumber or siding—all of which can conduct electricity.
- Make sure the area is clear of wires before working near trees or shrubs.
- Never attach or tie anything off to power lines or electrical equipment.

We offer a variety of bill payment options.

Automatic payments

Never worry about late payments again. We offer payment plans that automatically withdraw funds from your bank account.

One-time payment options

You can make a one-time payment for single or multiple accounts using your bank, checking or savings account.

Budget Plan

With the Budget Plan you can spread out your energy costs over the course of the year, so your bill is more predictable. You'll still pay for the exact amount of energy used annually, but your consumption rate is divided by 12 to determine your monthly budget amount.

Visit www.nationalgridus.com for a complete list of bill payment options.
