Gas Emergency

911 or 1-800-490-0045

24 hours a day, 7 days a week

- Smell gas? Act fast.
- Prevent carbon monoxide poisoning. Have all heating equipment checked yearly by a professional.

More Safety Tips:

- To save energy — and prevent burns — set your water heater temperature to 120 degrees F.
- Keep meters clear. Falling ice and heavy snow from a roof can damage meters or service connections, resulting in a gas leak.
- Have your dryer's gas line and connection inspected by a professional annually to ensure it is operating safely.

- Third-party notification: Call us to designate a relative, trusted friend or an agency to receive copies of notices should your account become overdue.
