An important update for our customers.

In order to continue meeting our customers' energy needs now, and in the future, National Grid has filed rate proposals with the New York State Public Service Commission to update and re-set natural gas delivery* rates for 2017 in New York City and Long Island/the Rockaway Peninsula for the first time in a decade.

During 2016, the stable delivery rates that have been in effect since 2008 will remain in place.

These proposals will allow us to continue investing in our natural gas networks and to improve service to our 1.8 million customers in Brooklyn, Queens and Staten Island and the Long Island/Rockaway Peninsula.

We have invested more than \$4.5 billion over the past decade to modernize and build a safer and more reliable natural gas system for our customers. During this period of time, we have also maintained stable delivery rates.

If approved by the Public Service Commission, the new delivery charges would take effect on January 1, 2017.

Please visit www.nationalgridus.com for additional information.

The proposals will allow us to accelerate our main replacement program and improve critical customer service.

*Delivery charges cover our costs to operate, maintain and modernize our distribution system and are fixed by regulatory rate agreements.

Plant a tree to celebrate Arbor Day. But call before you dig!

April 29 is Arbor Day, the annual observance that celebrates the role of trees in our lives. Celebrate the day by planting a tree – it can add value to your home and help to reduce energy costs!

Before digging

Before any planting or home improvement project that requires digging, please remember to first call **811** so the location of underground utility lines can be marked. It's a free service, and it's the law.

To provide shade in summer, yet let the sun's warmth in during winter, plant deciduous trees (trees that shed leaves in fall) such as maples, oaks, birch, locusts, and lindens on the east and south sides of your home.

For safety, efficiency turn down the temperature on your water heater.

Water heaters are the second highest source of energy usage in the home. To save energy — and money — set your water temperature at home to 120 degrees. You'll be less likely to burn your skin (at 140 degrees you risk burns in six seconds or less).

It's always a good idea to test the water temperature before your child gets in the tub.

Visit www.nationalgridus.com for available rebates, offers and services to help you save energy at home.

Did you know....

An average water heater lasts about 10 to 15 years and when it fails, it can leave you in a mess. Don't wait until it's too late to upgrade. Remember to always choose ENERGY STAR®-qualified appliances.

Discount rate may help you manage energy costs.

Income-eligible customers may qualify for a reduction in the “gas delivery cost” on the bill. To be eligible, an applicant must be a National Grid customer and receive one or more of the following benefits:

- Home Energy Assistance Program (HEAP)
- Medicaid
- Food Stamps
- Public Assistance (Family Assistance or Safety Net Assistance)
- Supplemental Security Income (SSI)
- Veteran’s Disability Pension
- Veteran’s Surviving Spouse Pension
- Child Health Plus

Choose a natural gas supplier with our NaturalChoice™ Program.

Our NaturalChoice Program gives both residential and business customers the power to choose their natural gas supplier, also known as an energy service company, or ESCO. By enrolling in NaturalChoice, you may be able to benefit from competition among gas ESCOs. No matter what company supplies your gas, we will continue to transport the natural gas from the ESCO to you, maintain our local gas distribution network, and be available 24 hours a day to respond to gas safety emergencies.

Visit www.nationalgridus.com for details, including a list of suppliers.

Braille Bills/Eye Saver Service

If someone you know is blind or sight-impaired, we can provide bills in Braille or in a larger print than our standard bill. For more information, please call Customer Service at **1-800-930-5003**.

Guard against scam artists, impersonators.

Be on the alert for billing scam artists and imposters posing as utility employees. Please be alert for these imposters who may try to gain access to sensitive account information or attempt to gain entry to your home.

- Every National Grid employee and all contractors doing work for us, carry a photo ID card. If someone requesting entry into your home or business does not show an ID card, don’t let them in and please call Customer Service at **1-800-930-5003**. If you feel you are in immediate danger, call **911**.
- We do call customers with outstanding balances, requesting payment and notifying of the potential for service interruption (due to non-payment). However, we do not accept pre-paid debit cards for payment and would never ask a customer to acquire one of these cards to make a bill payment.

Use caution near crews and work zones.

Our number one priority is the safety of the public, customers and employees. We want to remind motorists and pedestrians to be cautious in and around utility roadway work zones for their own safety and the safety of our employees and contractors.

Please restrain pets.

If you know we will be working in or near your home, please restrain or relocate your pet at that time. Thank you for your cooperation.
