

nationalgrid

Sign up for GreenUpSM and support a clean environment.

Join **GreenUpSM** and you can purchase your electricity from local hydro, wind, and solar sources. These renewable alternatives do not have the negative impacts of coal, gas and nuclear energy production. The end result? Greenhouse gas reductions and a cleaner energy future. Over 16,000 people have already made the switch— isn't it time you joined them?

How It Works:

When you join **GreenUpSM**, National Grid will continue to issue your electric bill and provide customer service. Your monthly bill will reflect a minimal additional cost for the **GreenUp** option that you select. If you choose to cancel your participation at any time, you can simply notify your supplier directly. You will not be charged a termination fee and you will remain a National Grid customer.

Getting Started with GreenUpSM is Easy!

Contact a supplier that is listed below directly.

Please be aware that you will have a renewable energy surcharge added to your monthly National Grid bill. National Grid will remain your electric company and provide your customer service and electric response.

That's how easy it is to reduce your dependence on conventional energy sources and support the development of renewable energy in your community. Remember — your choice can make a difference!

Green Energy Consumers Alliance | greenenergyconsumers.org/greenup | 1-617-397-5199 x2

A nonprofit based in Boston with a mission to speed the transition to a low-carbon future.

Choose:

- 100% New England Wind – 3.8 cents additional per kWh (\$23 per month for average household). 100% federally tax-deductible.
- 25% New England Solar, Wind, Low-impact Hydro, and Digester Gas – 2.2 cents additional per kWh (\$13/month for average household). 100% federally tax-deductible.

Sterling Planet | sterlingplanet.com/utility-programs-national-grid-ma-ngrid-ma/ | 1-877-457-7712

Invest in a cleaner New England. Support the production of renewable energy with Sterling MA Choice™.

- 25% New Wind and 75% Small Hydro. Provided in block quantities of 250 kWh, \$7.50 per month.

National Grid's GreenUpSM program is ranked among the top 10 green power programs nationwide by the U.S. Department of Energy.
