

THE NARRAGANSETT ELECTRIC COMPANY
OPTIONAL ENHANCED METERING SERVICE

Availability of Service

Enhanced metering service under this provision is available to nonresidential customers receiving metered retail delivery service from The Narragansett Electric Company (the “Company”). Customers who currently receive unmetered retail delivery service must request metered retail delivery service from the Company in accordance with the Company’s Terms and Conditions for Distribution Service. The availability of these services will be subject to the Company’s ability to render such service.

Service Option 1: Wireless Service

Under this service option, the Company will provide equipment at the customer’s facility which will allow for periodic wireless readings of the customer’s load. The Company will install, own and maintain the equipment in service. The customer, or its authorized representative, may receive the data through the optical port on the equipment or via subscription pursuant to Subscription Service for Interval Data over the Internet as provided through the Company’s Optional Interval Data Service tariff, as may be amended from time to time. The Company will store load information on the meter for a period of 15-20 days for customers with on-site generation and 30-35 days for customers without on-site generation. The Company will attempt to read the meters daily unless the delay is caused by the wireless service provider. This service requires a data plan from a telecommunications provider, which will be under the Company’s name, with the customer being responsible for the cost as identified below.

Fees for Service Option 1:

The equipment fee for this service is assessed on a one-time, lump sum basis as follows:

<u>Retail Delivery Service Under</u>	<u>Initial Lump Sum</u>
General Service Tariff	\$679

The annual fee for the data plan associated with this service is as follows:

<u>Retail Delivery Service Under</u>	<u>Annually</u>
General Service Tariff	\$17

Service Option 2: Service via Phone Line

Service under this option is only available at the Company’s discretion in situations where service under Option 1 is not feasible due to technical or other logistical reasons. Under this service option, the Company will provide equipment at the customer’s facility which will allow for periodic readings of the customer’s load through telephone lines. The Company will

THE NARRAGANSETT ELECTRIC COMPANY
OPTIONAL ENHANCED METERING SERVICE

install, own and maintain the equipment in service. The customer, or its authorized representative, may receive the data through the optical port on the equipment or electronically. The Company will store load information on the meter for a period of 15-20 days for customers with on-site generation and 30-35 days for customers without on-site generation. The Company will attempt to read the meters daily unless the delay is caused by the landline service provider.

Fees for Service Option 2:

The customer has the choice of a single payment or a monthly fee.

<u>Monthly fee</u>	<u>Single Payment</u>
\$5.54	\$350.58

Service Option 3: Modem Service

Customers who wish to connect their own load recording equipment or equipment provided by their authorized representative to the Company's meter may elect this option. Narragansett will provide a pulse interface device through which the customer can access meter data. The customer, or its representative, must purchase, own and maintain a modem-equipped recording device in order to access meter pulses.

Fees for Service Option 3:

The customer has the choice of a single payment or a monthly fee.

<u>Monthly fee</u>	<u>Single Payment</u>
\$2.74	\$173.58

All equipment and data plan usage fees will be billing annually or as a one-time charge either through the account's electric retail delivery service bill or separately as determined by the Company.
