

National Grid's Benchmarking Program

# Get your building to perform at its best.

## Put energy efficiency and sustainability to work.

**If someone were to ask you to rate the energy efficiency of your building as it compares with others, where would you start?**

National Grid and our partners at Leidos are here to help you understand your building's current level of energy efficiency and provide support to get it to perform at its best. And, it's not just about saving money – it's also about reducing carbon emissions to help preserve our planet.

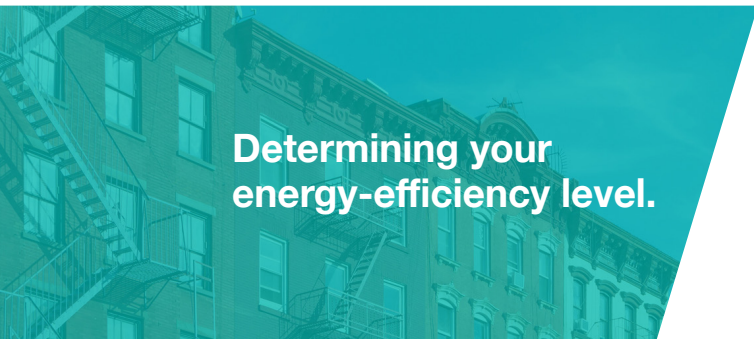

**Multifamily**

**Commercial**

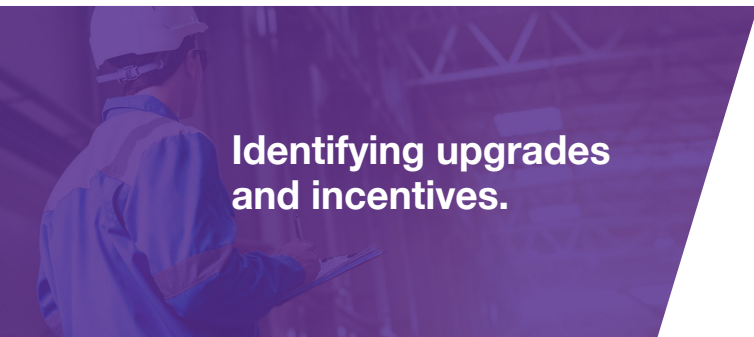

**Industrial**

### Determining your energy-efficiency level.

If you haven't benchmarked your building energy use we can help you do so with energy audits and ENERGY STAR® Portfolio Manager. If you have benchmarked your building, we can use your existing score.

### Identifying upgrades and incentives.

As part of your energy assessment, you'll get a detailed report with energy-efficient upgrade recommendations. We'll also help you find financial incentives to reduce your initial investment and shorten the payback period.

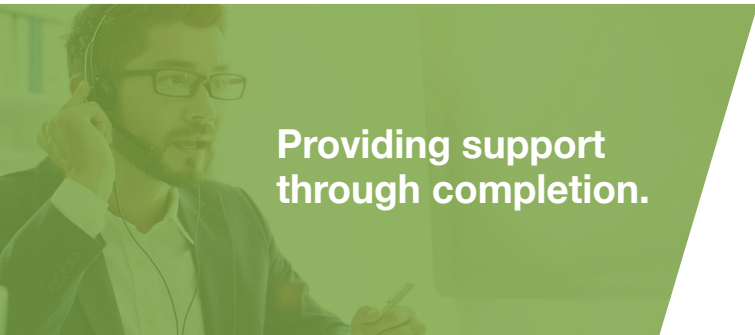

Let's work together and improve your building performance.

**Visit:** [ngrid.com/benchmarking](https://ngrid.com/benchmarking)

**Phone:** 877-370-5043

### Creating an action plan.

National Grid and our partners at Leidos will create a plan to help you understand what you need to do to enhance your energy efficiency.

### Providing support through completion.

We'll be your guide from start to finish, including securing incentives for energy-efficiency upgrades.

### Take advantage of energy-efficiency programs.

We can help you meet future building performance standards.

#### Prescriptive Incentive Measures:

Incentives for a variety of boilers and other heating equipment.

#### Direct Install Programs:

No-cost installations of high-efficiency water and energy-saving measures.

**Custom Incentive Measures:** One-time incentives on pre-approved projects not covered by common incentive measures.

Let's work together and improve your building performance.
