

BPI Building Analyst Technology

Start a lasting career in home performance with BPI's Building Analyst Technician Certification.

The BPI Building Analyst Technician (BA-T) certification is an early-career credential for workers in the home performance industry. It is a prerequisite to the Building Analyst Professional and naturally builds toward the top professions in the industry. It gives a great start in the industry while providing a clear path for professional growth.

A BA-T's work includes data collection and diagnostic testing for a whole-home assessments. The BA-T's skills and knowledge include: buildings and their systems, testing & data collection, and industry standards.

The BA-T is the right place to begin a lasting career in home performance.

Steps to earning BPI's Building Analyst Technician Certification.

- 1 Apply at ngrid.com/bpicertified.
- 2 Get matched with a participating training location.
- 3 Earn the Building Science Principles Certificate of Knowledge.
- 4 Get expert training for the BA-T certification exam.
- 5 Challenge the BA-T exam.

BPI Building Analyst Technicians must recertify every three years.

Candidates that meet specific work experience criteria during their certification period may be able to bypass the recertification exam.
