BPI Multifamily Building Analyst

BPI Multifamily Building Analyst (MFBA) certification is perfect for those that want to provide efficient, healthy, comfortable homes for renters.

The BPI Multifamily Building Analyst (MFBA) conducts energy audits and performs overall building performance evaluations of multifamily buildings. These building professionals examine the relationship between the building's various systems and apply knowledge and skills to complete comprehensive evaluations of existing buildings.

They provide multifamily building owners with prioritized recommendations to improve occupant health, safety, and comfort as well as the building's energy efficiency and durability.

The MFBA is a comprehensive certification for those who understand the impact of poorly performing multifamily buildings and want to make a difference.

Steps to earning BPI's Multifamily Building Analyst Certification.

1 Apply at **ngrid.com/bpicertified**.

2 Get matched with a participating training location.

3 Earn the Building Science Principles Certificate of Knowledge.

4 Get expert training to prepare for the MFBA exam.

5 Challenge the MFBA certification exam.

BPI Multifamily Building Analysts must recertify every three years.
Candidates that meet specific criteria during their certification period may be able to bypass the recertification exam.
