

## Massachusetts

# Participate in the Daily Dispatch Summer option and receive incentives!

30 to 60 Curtailment Events per Summer

**Working together to lower peak energy demand.**

The electric grid is sized on more than just peak hours of the year. Every daily peak in the summer is used to calculate to size requirement for grid infrastructure. By reducing peak electric use and daily peaks in July and August, we can reduce the size requirement of the grid – lowering long terms costs and carbon emissions. That’s why the sponsors of Mass Save® are working with experienced curtailment service providers (see reverse) to offer our commercial and industrial customers incentives to reduce daily peaks!

**Reducing energy is even more rewarding when you curtail electricity use during Daily Dispatch events.**

### INCENTIVE PAYMENT

**\$200 per average kW reduction per summer**

**For example,** if you curtailed an average of **100 kW** of electricity over the summer, the incentive your sponsor would make available would be:

$$100kW \times \frac{\$200}{kW} = \$20,000 \text{ every summer}$$

**EVERSOURCE**

**nationalgrid**

**Unitil**  
energy for life

**mass save**  
Savings through energy efficiency

## Select your curtailment service provider to get started.

Contact one of our approved curtailment service providers to tap into their demand response expertise.

### Direct Participation and Shared Savings

- Curtailment service providers (CSPs) help customers to create a curtailment plan; make sure customers are notified for each event by voicemail, email, and/or text message; review customer performance; and, if applicable, help customers to co-enroll in ISO-NE's markets. For their services, CSPs require a portion of a customer's incentive. Your MassSave® sponsor will pay the incentive directly to the CSP. How much of this incentive is passed down to the customer depends on the negotiations between the customer and the CSP.
- Customers may enroll directly into Daily Dispatch without a CSP. However, the customer will then be responsible for services a CSP would normally provide, and the customer may not be able to co-enroll in ISO-NE's markets. Your MassSave® sponsor will email direct participants event notifications the day before a curtailment event starts.

### Eligibility Requirements

- The customer must have an electric service account of one of the sponsors in Massachusetts.
- The customer must be on a commercial electric rate, and pay for the energy efficiency fund.
- The customer must enroll before May 31 to participate in that year's program.
- Customers who sign up for the program will remain in the program until they unsubscribe.

### About Daily Dispatch Summer Events

- Events will be called the day before curtailment is needed
- A maximum of 60 events will be called per summer.
- All events will last from 2 to 3 hours and occur between 2 p.m. and 7 p.m.
- All events will be called in June, July, August, or September. However, most events will be called in July and August.

### About the Incentive

- Incentives will be paid out in the end of November of each year.
- Incentives will be based on the customer's average curtailment amount for all events called that summer.
