

## Massachusetts

# Participate in the Targeted Dispatch Winter option and receive incentives!

Up to 5 Curtailment Events per Winter

**Working together to lower peak energy demand.**

There are times throughout the winter when electricity use in Massachusetts reaches its highest levels. By reducing overall peak energy demand during these times, we can decrease the need for infrastructure upgrades and minimize carbon emissions. That's why the sponsors of Mass Save® are working with experienced curtailment service providers (see reverse) to offer our commercial and industrial customers incentives to reduce the peak!

**Reducing energy is even more rewarding when you curtail electricity use during Winter Dispatch events.**

### INCENTIVE PAYMENT

**\$25 per average kW reduction per winter**

**For example,** if you curtailed an average of **100 kW** of electricity over the summer, the incentive your sponsor would make available would be:

$$100kW \times \frac{\$25}{kW} = \$2,500 \text{ every winter}$$

**EVERSOURCE**

**nationalgrid**

**Unitil**  
energy for life

**mass save**  
Savings through energy efficiency

## Select your curtailment service provider to get started.

Contact one of our approved curtailment service providers to tap into their demand response expertise.

### Direct Participation and Shared Savings

- Curtailment service providers (CSPs) help customers to create a curtailment plan; make sure customers are notified for each event by voicemail, email, and/or text message; review customer performance; and, if applicable, help customers to co-enroll in ISO-NE's markets. For their services, CSPs require a portion of a customer's incentive. Your MassSave® sponsor will pay the incentive directly to the CSP. How much of this incentive is passed down to the customer depends on the negotiations between the customer and the CSP.
- Customers may enroll directly into Winter Dispatch without a CSP. However, the customer will then be responsible for services a CSP would normally provide, and the customer may not be able to co-enroll in ISO-NE's markets. Your MassSave® sponsor will email direct participants event notifications the day before a curtailment event starts.

### Eligibility Requirements

- The customer must have an electric service of a sponsor in the State of Massachusetts.
- The customer must be on a commercial electric rate and pay for the energy efficiency fund.
- The customer must enroll before November 30 to participate in that year's program.
- Customers who sign up for the program will remain in the program until they unsubscribe.

### About Targeted Dispatch Events

- Events will be called the day before curtailment is needed.
- A maximum of 5 events will be called per winter.
- All events will last for 3 hours.
- All events will occur on weekdays (not weekends), and not on holidays.
- All events will be called in December, January, February, or March.

### About the Incentive

- Incentives will be paid out in May of each year.
- Incentives will be based on the customer's average curtailment amount for all events called that winter.
