

Financial Savings and Incentives for EV Charging.

Upstate New York

Whether you are a residential customer, business owner, municipality, have a multi-unit dwelling, or are looking to electrify your fleet, our EV Charging Programs provide financial savings and incentives to help our communities move toward a sustainable future.

- **Public/Retail/Municipal** — We can assist businesses and municipalities with installing EV charging infrastructure to help attract and retain a growing demographic of drivers.
- **Workplace** — We can help employers provide employees, vendors, and business partners a desirable benefit and reinforce your commitment to sustainability.
- **Multi-Unit Dwellings** — We can help you offer a new level of convenience to differentiate your property and help draw new residents with this sought-after amenity.
- **Fleet** — As part of our Fleet Advisory Service, we can provide no-cost comprehensive fleet infrastructure assessments for light-, medium-, and heavy-duty fleets that evaluate site feasibility, bill impacts, EV charging infrastructure incentive options, and offer a tailored charging analysis to empower your commercial fleet's transition to electric vehicles.
- **Residential** — Our residential managed charging offerings provide financial savings for at-home charging during off-peak hours.

Additional Bill Savings:

- **Demand Charge Rebate** — Our business customer discount on billed demand charges for qualified accounts.

Now is a great time to talk with us about our EV Charging Programs — We're here to help.
