

Electric Vehicle Charging Program Qualified Products List

Beginning April 1, 2024, National Grid is transitioning hardware qualification to EPRI.

To search the EPRI Vetted Product List (VPL), follow these steps:

1. Go to <https://epri.co/VettedProductList>
2. Navigate to the "Massachusetts" tab to view eligible products

For full product details, search the model number on the Full List tab.

Beginning in January 2025, all L2 and DCFC hardware must be listed on the Massachusetts tab of the EPRI VPL to be eligible for the MA EV Charging Program.

Qualified EVSE Hardware – Level 2

Beginning April 1, 2024, L2 products are eligible for use in the MA EV Charging Program if they are:

- 1) Listed in the Massachusetts State Appliance Standards Database (SASD): (<https://neep.org/SASD>), and are OCPP-compliant (multi-unit dwellings excluded).

OR

- 2) Listed in the Massachusetts tab of the [EPRI VPL](#).

List of L2 hardware from the SASD with OCPP compliance included below:

Manufacturer	Model
Atom Power	AEVBox2-80-25 AEVPED#-48-## AEVPED#-80-##

Electric Vehicle Charging Program

Qualified Products List *(continued)*

Qualified EVSE Hardware – DCFC

Beginning April 1, 2024, DCFC products are eligible for the MA EV Charging Program if they are:

1) Included in the list below.

OR

2) Listed in the Massachusetts tab of the [EPRI VPL](#).

Manufacturer	Model
ABB	HVC-C 150 Terra HP 350 Terra 54 Terra 124 Terra 54 HV Terra 184 Terra HP 175
