

We can help drive new visitors to your community.

Get up to 100% funding on electrical infrastructure.

As more electric vehicles hit the road in the coming months, we're here to help you accommodate them. One way we're doing that is through our Upstate NY Make-Ready Program—an initiative that provides up to 100% funding for EV charging stations. With 850,000 new EVs expected on our roads by 2025, it's a great time to add charging stations to your town.

Adding just one EV charging station can:

Give your destination a competitive advantage

Attract new and repeat EV driving customers

Encourage longer visits

Add value to your town or municipality

Demonstrate your environmental commitment to the community
