

We can help drive new customers to your location.

Get up to 100% funding on electrical infrastructure.

As more electric vehicles hit the road in the coming months, we're here to help you welcome them. One way we're doing it is through our Upstate NY Make-Ready Program—an initiative that provides up to 100% funding for EV charging stations. With 850,000 new EVs expected on our roads by 2025, it's a great time to consider adding charging stations to your retail location.

Adding just one EV charging station can:

Give your establishment a competitive advantage

Attract new and repeat EV-driving customers

Encourage longer customer visits

Add value to your property

Demonstrate your environmental commitment to the community
