Signify Wireless Lighting Control Solution

Easy. Effective. Smart

Robb Rodriguez, RCM Northeast Signify NA

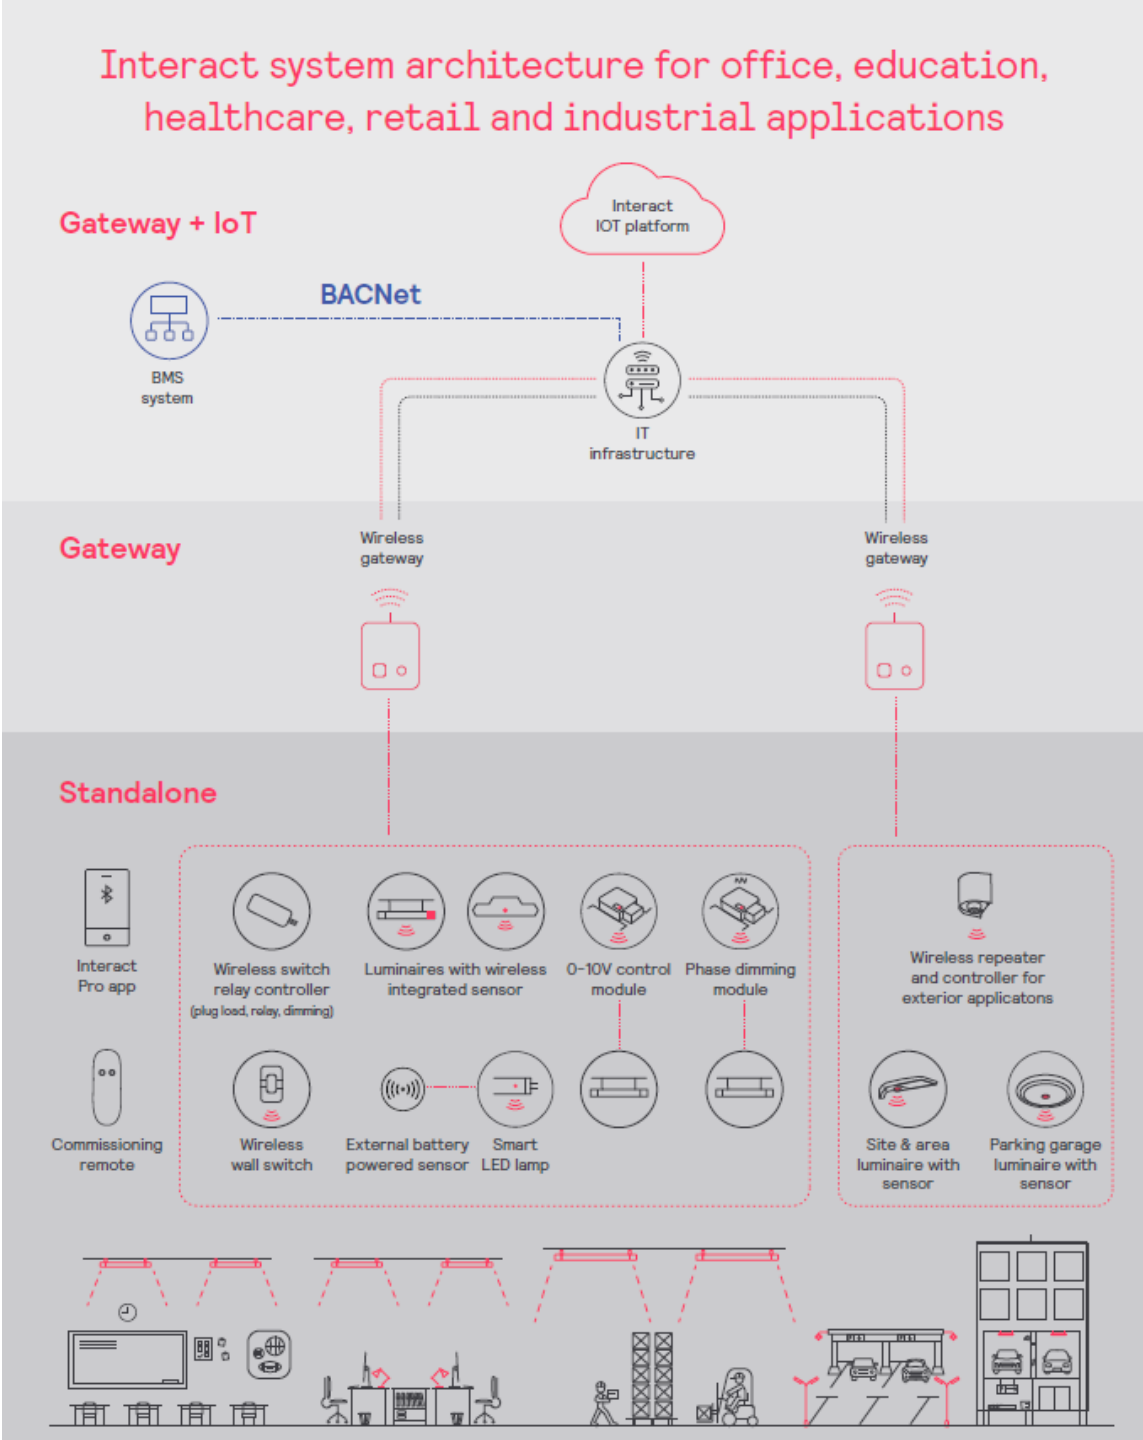

One simple, code-compliant,
wireless solution for every step
of your smart lighting journey.

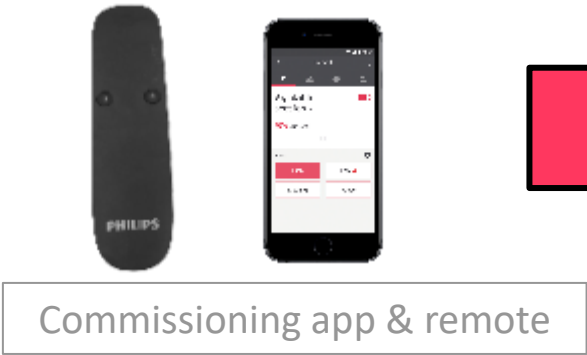

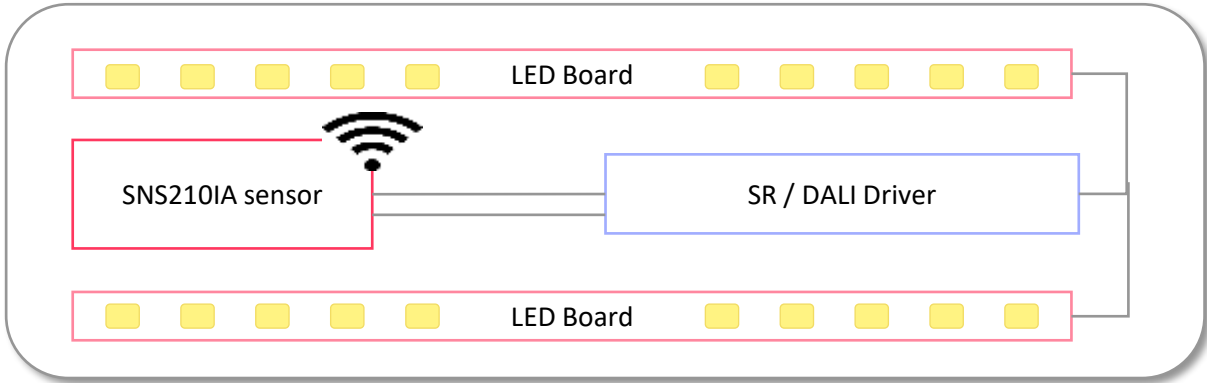

Interact – system options

for office, education, healthcare, retail and industrial applications

	Standalone	Gateway	Gateway + IoT
Dimming, grouping, and zoning	✓	✓	✓
Bluetooth and ZigBee enabled	✓	✓	✓

Gateway + IoT

interact

Standalone
Start simple

Just light.

Simply specify and install your
Interact ready luminaires,
retrofit kits and LED lamps,
or integrate
with 3rd party luminaires.

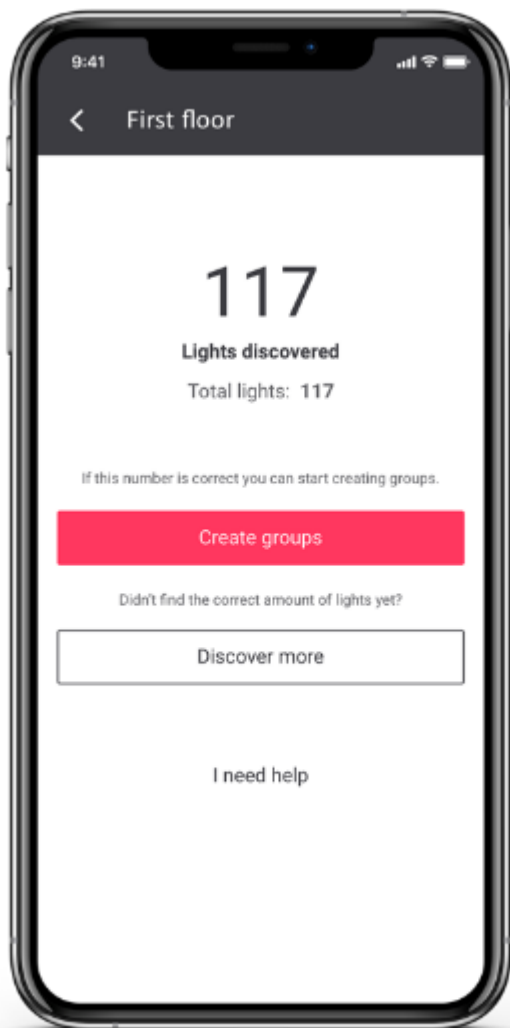

Key takeaways

- ✓ Lum integrated wireless sensor – occupancy (PIR) & daylight sensing
- ✓ Future ready – add a gateway and get access to more capabilities
- ✓ Vacancy mode – configure for Manual ON / Auto OFF
- ✓ High end trimming – adjust max output
- ✓ DLC compliant – for networked lighting controls
- ✓ Rebate complaint – ROI of ~2 years
- ✓ Fast Setup - point to point commissioning is easier & more flexible than “discover” commissioning
- ✓ Code Compliant – ASHRAE, IECC, Title 24
- ✓ UL924 Emergency compliant – compatible with a generator

interact

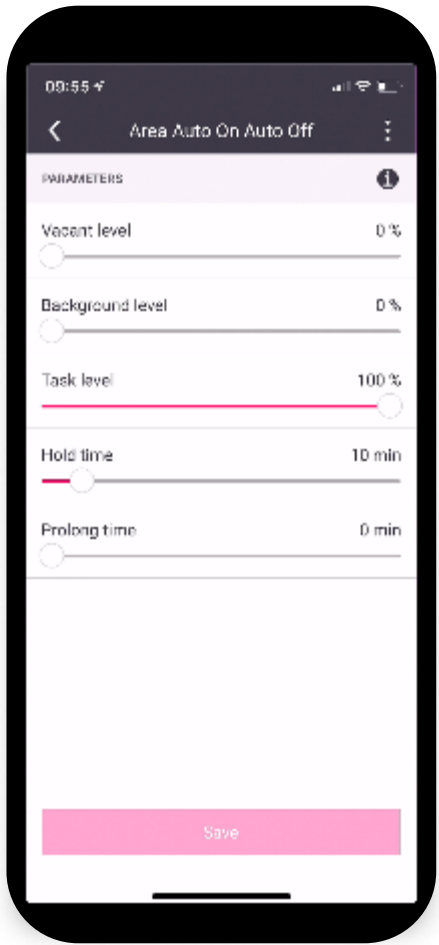

...and an app

Connect your lights via Bluetooth with
the intuitive Interact Pro app

Switch on/off behavior

Controlling a group of lights with sensors

A photograph of two men standing side-by-side. The man on the left is wearing a dark suit jacket over a light-colored button-down shirt. The man on the right is wearing a yellow and black plaid button-down shirt over a dark t-shirt. The background is a plain, light-colored wall. Overlaid on the image is white text.

Smart lighting is easy. Honestly.

No extra cables.
Easy-as-can-be commissioning.
Interact has it all.

Sounds good?
Well, it gets better.

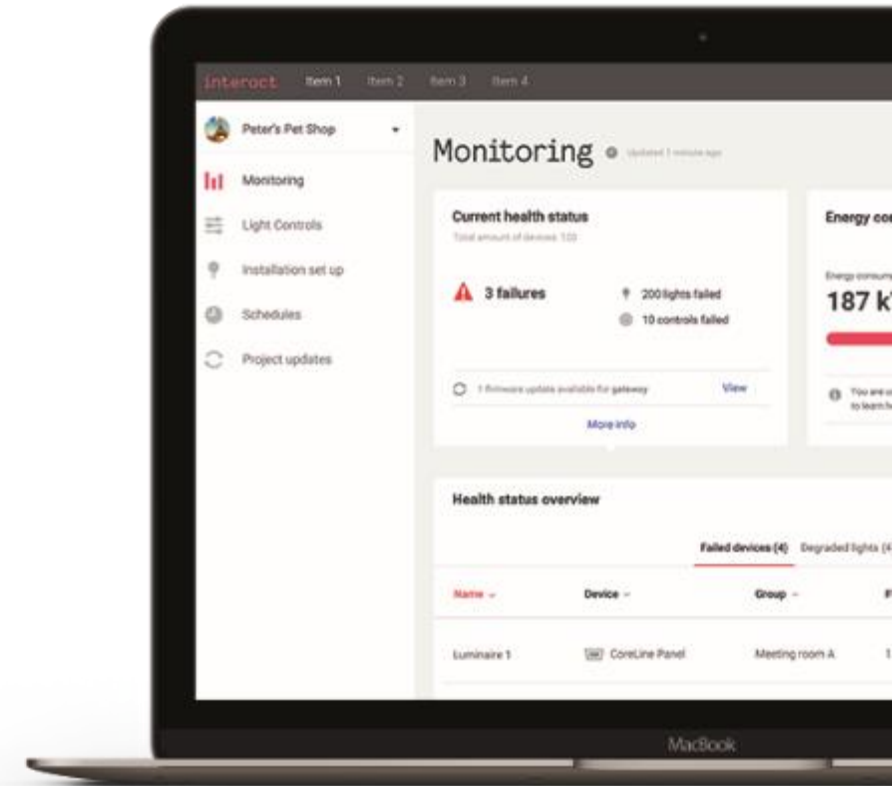

Gateway

As business requirements change,
upgrade your system by simply
adding a gateway

Gain instant access to cloud-based benefits and functionalities

- ✓ Scheduling of lighting for user comfort and energy savings
- ✓ Multiple screens/phones of users can connect to the gateway to change light settings and schedules
- ✓ Remote access, adaptation and energy monitoring for improved business operations
- ✓ Dashboard with lighting point information regarding lifetime and health for efficient post-installation service

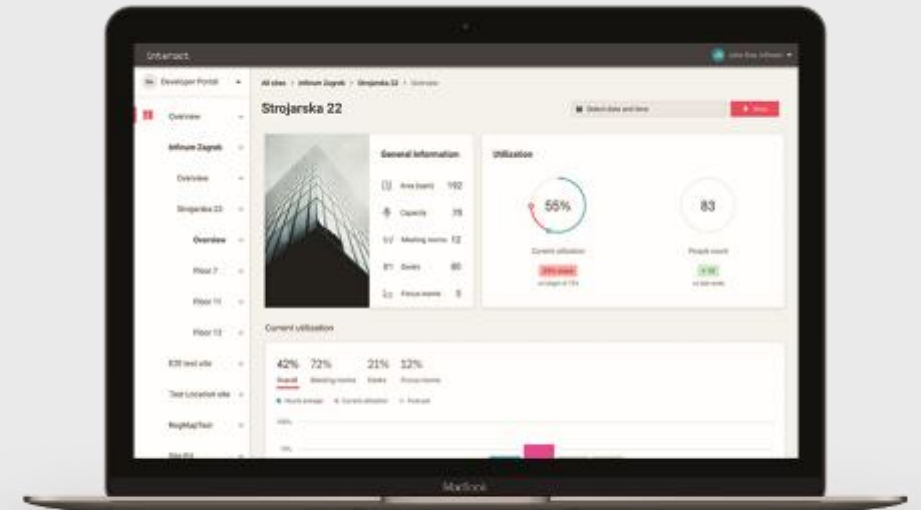

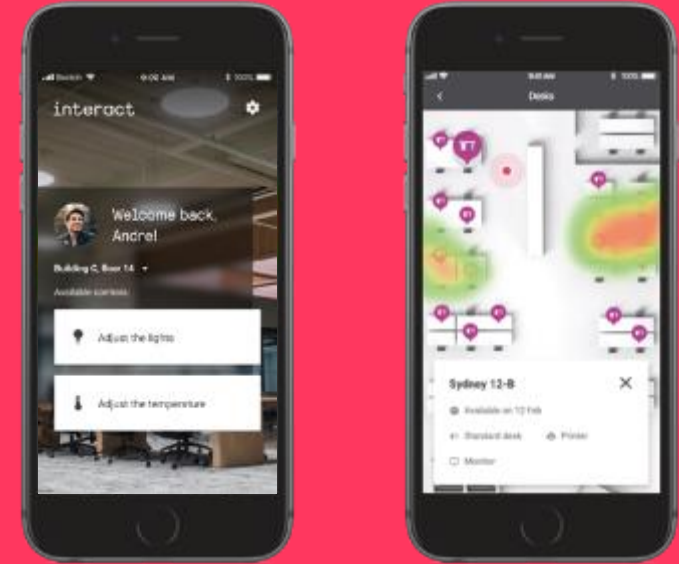

Gateway + IoT

Further upgrade your system and
tap into the full potential of IoT

IoT benefits

- Optimize workspace utilization
- Minimize waste with real-time wayfinding and boost collaboration with desk/room booking tools
- Provide occupancy transparency across entire portfolio to optimize costs
- Improve occupational safety and productivity
- Personalize settings to boost employee comfort and wellbeing
- Unlock more savings with BMS integration

Support for wireless lamps

MasterConnect TLEDs

MasterConnect TLEDs

- Available as Type B (ballast bypass)
- Type A available upon request

Coupled with battery powered sensors for sensing behaviors

Self powered wireless switch

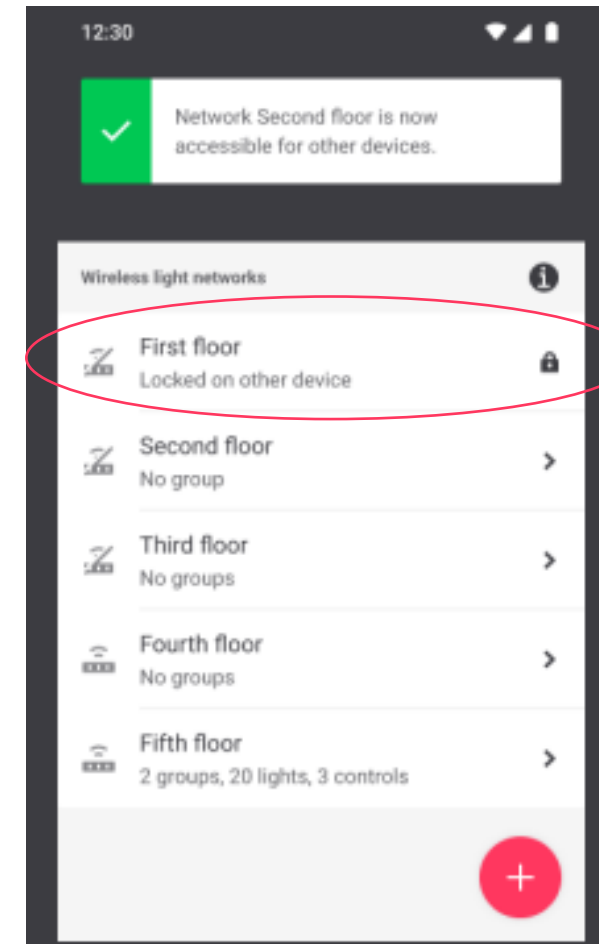

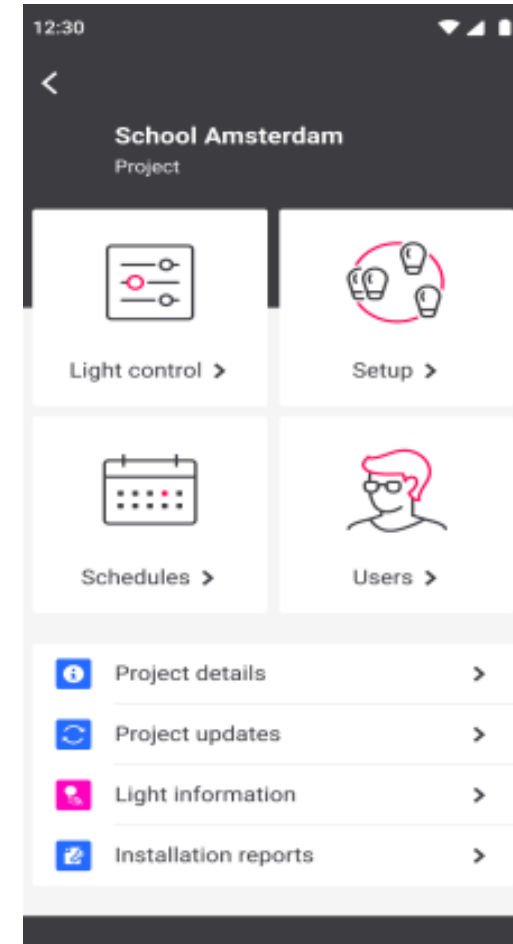

New UID8465/10

- One device – field configurable to be either 2 button or 4 button switch
- No batteries, no electrical power, self-powered using kinetic energy of button push action
- Wireless communication using ZigBee Pro protocol, and configured through Interact Pro App
- Interact rules applicable – up to 5 switches in a group and wireless range of 30' between devices (mesh hopping)
- 12NC: 912401592204

App updates

- Tunable White
- New project landing page, updated UI
- Ability to simultaneously commission projects at network level
- Security lock is moved to network level from project level
- Locked by “whom” details displayed in case network is locked for you
- Simplified User Roles
- Control over personal data, allow users to initiate deletion of account from within the app

National Grid Demand Response Overview

Paul Wassink Paul.Wassink@nationalgrid.com

C&I Demand Response 2024 – PEX Training

What is Demand Response and Why do We Do It?

The whole grid is sized to meet the peak.

“The top 10% of hours during these year, on average, accounted for 40% of the annual electricity spend...”

Commercial Programs

Targeted Dispatch

Daily Dispatch

Residential Programs

Thermostats

Residential Batteries

Measuring Performance

2 Options to Curtail

Program Parameters

Typical Application

Targeted Dispatch

- 3 - 6 events per summer
- 3 hours per event
- **\$35/kW-summer**

Daily Dispatch

- 30 - 60 events per summer,
- 2 - 3 hours per event
- **MA: \$200/kW-summer**

3 Options to Curtail

Program Parameters

Typical Application

Targeted Dispatch

- 3 - 6 events per summer
- 3 hours per event
- **\$35/kW-summer**

Daily Dispatch

- 30 - 60 events per summer,
5 events per winter
- 2 - 3 hours per event
- **MA: \$200/kW-summer**

Basics of Targeted Dispatch

- Typically 3 – 6 events per summer
- 3 hours per event
- Between 3 – **8**pm
- Customers/Vendors are notified the day before.
- Weekdays and **Weekends**
- Not Holidays
- Paid by performance \$35/kW-summer

Event Windows (New)

Events are still only 3 hours long, but now they can happen between 3pm and 8pm.

Option 1:

Option 2:

Option 3:

Other Benefits of Demand Response

As much as \$105 per kW →
every year

Market
Participant
Needed
(aka CSP)

FCM
~\$40/kW

ICap
~\$40/kW

NGrid Summer
\$35/kW-Year

Weekend Bonus

1. **Weekend Events are very rare**
2. **Every Customer is Automatically Enrolled**
3. **There is no penalty if customers don't participate for a weekend event**
4. **Customers can make more money if they curtail during a weekend event.**

\$10/kW-Summer

Example of How DR Can Help EE

A 200,000 sf facility has about 1 cfm/sf. This would lead to
~150kW of fan energy

$$200,000sf \cdot \frac{1cfm}{sf} \cdot \frac{1hp}{1000cfm} \cdot \frac{0.75kW}{hp} = 150kW \text{ fan}$$

Dialing down a VFD from 80% speed to 60% speed for DR events would
save ~ 87kW

$$P_2 = 150kW \cdot \left(\frac{60\%}{80\%}\right)^3 = 63kW$$

That is worth about **\$3,000** per year in DR incentives in addition to the
energy savings and standard incentives.

3 Options to Curtail

Program Parameters

Typical Application

Targeted Dispatch

- 3 - 6 events per summer
- 3 hours per event
- **\$35/kW-summer**

Daily Dispatch

- 30 - 60 events per summer,
- 2 - 3 hours per event
- **MA: \$200/kW-summer**
- **RI: \$300/kW-summer**

Basics of Daily Dispatch

- Typically 30–60 events per summer
- 2 - 3 hours per event
- Between 3 – 8pm
- Customers/Vendors are notified the day before.
- Weekdays and Weekends
- Paid by performance MA: \$200/kW-summer

Batteries and Daily Dispatch

Content credentials

Curtailment Service Providers – What do they do?

1. **Explain the basics of demand response**
2. **Complete an audit to estimate the customer's curtailment potential**
3. **Give the customer an estimate of DR revenue from ISO's program, National Grid Program, and ICap Reduction**
4. **Make sure customers are contacted on event days**
5. **Give customer post-event feedback on performance**
6. **Double check the incentive calculations**

Participate in the Targeted Dispatch Summer option and receive incentives!

1 to 8 Curtailment Events per Summer

Working together to lower peak energy demand.

There are times throughout the summer when electricity use in Massachusetts reaches its highest levels. By reducing overall peak energy demand during these times, we can decrease the need for infrastructure upgrades and minimize carbon emissions. That's why the sponsors of Mass Save® are working with experienced curtailment service providers (see list below) to offer our commercial and industrial customers incentives to reduce the peak!

Reducing energy is even more rewarding when you curtail electricity use during Targeted Dispatch events.

INCENTIVE PAYMENT
\$35 per average kW reduction per summer

For example, if you curtailed an average of 100 kW of electricity over the summer, the incentive your sponsor would make available would be:

$100\text{ kW} \times \$35/\text{kW} = \$3,500 \text{ every summer}$

When you curtail electricity use during Targeted Dispatch events, you will receive an incentive from your curtailment service provider. Incentives will be based on the customer's average curtailment amount for all events called that summer.

- Incentives will be paid out in November of each year.
- Incentives will be based on the customer's average curtailment amount for all events called that summer.

PDFPlus
Document

Participate in the Daily Dispatch Summer option and receive incentives!

30 to 60 Curtailment Events per Summer

Working together to lower peak energy demand.

The electric grid is sized on more than just peak hours of the year. Every daily peak in the summer is used to calculate the size requirement for grid infrastructure. By reducing peak electricity use and daily peaks in July and August, we can reduce the size and requirement of the grid - lowering long term costs and carbon emissions. That's why the sponsors of Mass Save® are working with experienced curtailment service providers (see list below) to offer our commercial and industrial customers incentives to reduce daily peaks!

Reducing energy is even more rewarding when you curtail electricity use during Daily Dispatch events.

INCENTIVE PAYMENT
\$200 per average kW reduction per summer

For example, if you curtailed an average of 100 kW of electricity over the summer, the incentive your sponsor would make available would be:

$100\text{ kW} \times \$200/\text{kW} = \$20,000 \text{ every summer}$

   

Incentives will be based on the customer's average curtailment amount for all events called that summer.

Quick Hits and Reminders

Mathew McCarthy Mathew.McCarthy@nationalgrid.com

Quick Hits – Reminders

Upcoming Trainings

- Mass Save events and trainings can be found [here](#).
- Custom/Prescriptive lighting tool training – recording is available on the PEX landing page.
- NEBFM 2024 - The 18th Annual [Northeast Buildings & Facilities Management Conference](#) is scheduled to take place April 23rd & 24th at the DCU Center in Worcester, MA. If you are interested, please click [here](#) to register.

Updated National Grid MA Sales Representative Lookup Tool

- An updated sales representative look up tool is now available.

Project Expediter Landing Page

- www.nationalgridus.com/MA-Project-Expediter-Program

PEX Finder Tool Update

- <https://www.nationalgridus.com/project-expediter#perfectPartner>

Quick Hits – Reminders

National Grid Projects

- **All PEX Gas Applications and Associate PEX Applications – If you are submitting a gas application or if you are an associate PEX, please note your PEX status when emailing your National Grid sales rep applications and associated documentation. This will help ensure the application is entered as a “PEX” application so it will show up in our PEX reporting.**

Green Communities Updates

- **Key dates/deadlines for Green Communities (GC) are available [here](#).**

2024 Commercial National Grid Heat Pump Rebate Form

- **The 2024 C&I National Grid heat pump rebate form is ready for use.**

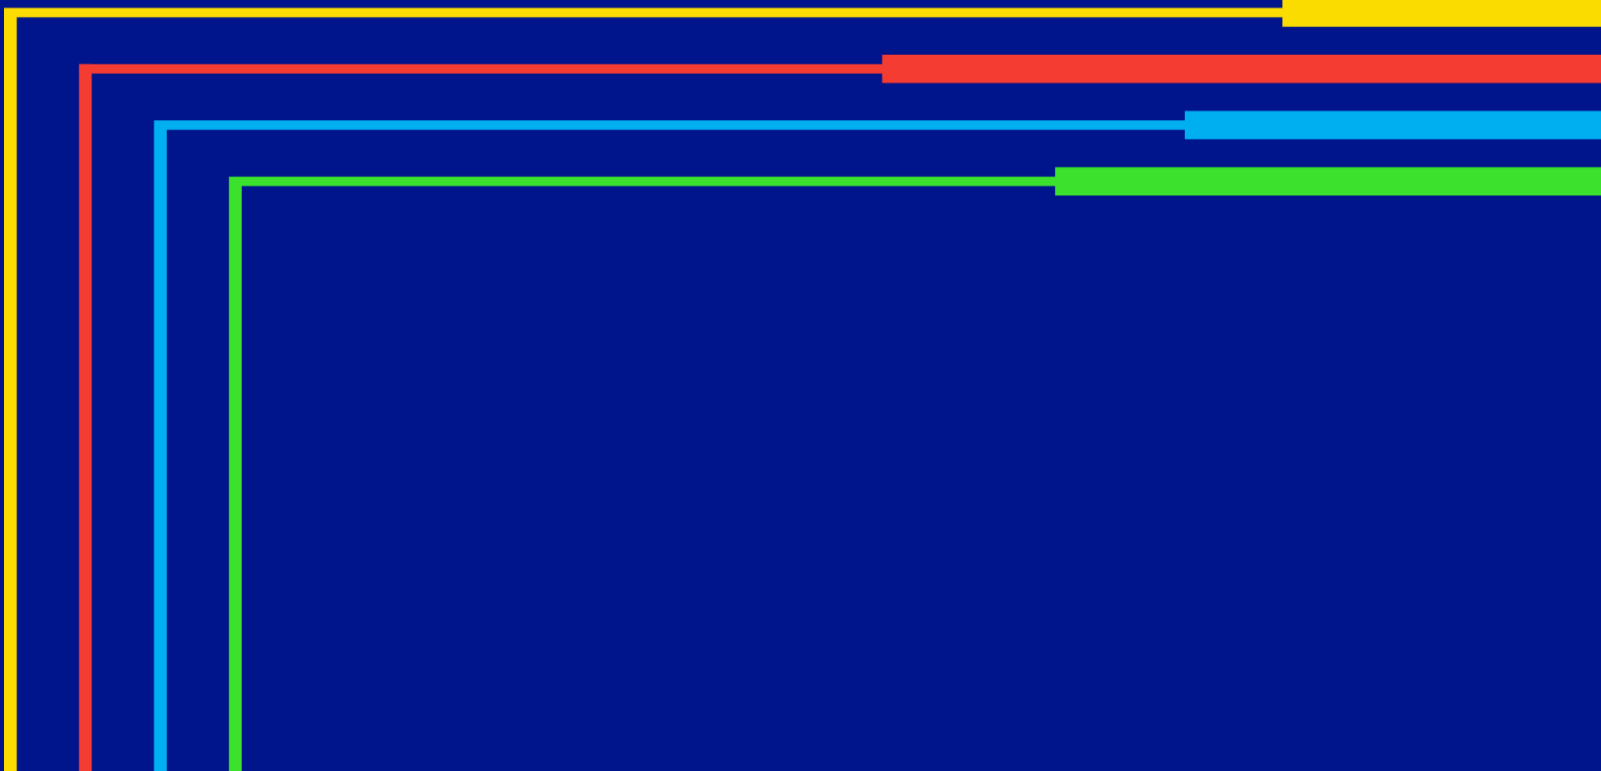

Background Checks

- **New PEX employees require Level 2 background checks (with 4-panel drug screening) if they have direct contact with National Grid customers on their property and/or access National Grid database. Contact Accurate Background checks for more details.**
