

Dairy and Livestock Program

## Financial incentives for a healthier bottom line.

### We can help you lower operating costs and increase productivity.

From streamlining your existing operation to growing your business, our Dairy and Livestock Program can support your business and sustainability goals.

#### PROGRAM BENEFITS

- ◆ **Reduce Energy Costs and Meet Sustainability Goals:** Cutting energy use can lower expenses and reach carbon emissions reduction targets.
- ◆ **Improve Health and Efficiency:** Properly maintaining equipment can help keep your livestock and crops healthy while improving yields.
- ◆ **Reduce Maintenance:** Improving the reliability and efficiency of your systems can minimize disruptions and cut maintenance times and costs.

#### PROGRAM INCENTIVES\*

Our Farm Express Program can help you save on common energy-efficiency upgrades.

| MEASURES                                     | FINANCIAL INCENTIVES                                                                                                                                                                                                                                                                                            |
|----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Livestock Waterer                            | \$100/unit energy efficient with heater<br>\$200/unit energy-free waterer                                                                                                                                                                                                                                       |

## Dairy and Livestock Program: **Financial incentives for a healthier bottom line.**

### CUSTOM PROJECTS

If you have upgrades to equipment or processes planned that are not included in the Farm Express Program, we have customer financial incentives that can cover up to 65% of project costs.\*

### LOW-COST FINANCING

In addition to the financial incentives for upgrading your equipment, we also offer low-cost financing that can help make upgrading more attainable.

**Financing can be as low as:** 0% interest for 24 or 36 months, or 1.99% interest for 48 or 60 months – all with \$0 down.\*\*

### ECONOMIC DEVELOPMENT PROGRAM

Grant opportunities are available to help fund energy efficiency, productivity improvements, renewable energy installation, and utility infrastructure upgrades.

Learn more at [shovelready.com](http://shovelready.com).

### NYSERDA NO-COST AGRICULTURE ENERGY AUDIT PROGRAM

Visit [nyserda.ny.gov/all-programs/programs/agriculture-energy-audit](http://nyserda.ny.gov/all-programs/programs/agriculture-energy-audit) or call **1-800-732-1399**.

Audits may be submitted to [aEEP@nyserda.ny.gov](mailto:aEEP@nyserda.ny.gov).

“Keeping cows cool and comfortable in the summer is important for maintaining milk production; so, energy costs are a big deal. The incentives we received from National Grid will help us improve efficiency and save money.”

– *Crystal Grimaldi, member of Ideal Dairy, LLC and great-great-granddaughter of the founder.*

**Create a more energy-efficient agribusiness.**
