

Take Charge of Sustainability

Install EV Charging Stations for your customers,
employees, tenants and community

GET UP TO 100% IN FINANCIAL INCENTIVES on approved projects

Massachusetts EV Charging Station Program

► Standard Rebate Application

- Up to 100% Installation costs rebated for approved projects (infrastructure)
- PLUS (for Level 2 stations only) a portion of EV charging station equipment cost (charging station hardware)
 - ◆ Up to 50% Rebate for Workplace stations
 - ◆ Up to 75% Rebate for Multi-Unit Developments and Publicly Accessible stations
 - ◆ Up to 100% Rebate for stations where the station location meets at least two Economic Justice Criteria
 - See http://maps.massgis.state.ma.us/map_ol/ej.php
- Please use this application for new construction projects, projects that consist of more than 5 dual-port (or 10 single-port Level 2 stations), or for projects using DC fast chargers only
- Cost estimates for installation and equipment and site plan are required with application
- Rebates limited to actual cost of installation and equipment

► Prescriptive Rebate Application

- \$5000 per port for charging station infrastructure for approved projects
- PLUS (for Level 2 stations only) a portion of EV charging station equipment rebate (charging station hardware)
 - ◆ \$1700 rebate per port for Workplace stations
 - ◆ \$2550 rebate per port for Multi-Unit Dwellings and Publicly Accessible stations
 - ◆ \$3400 rebate per port for stations where the station location meets at least two Economic Justice Criteria
 - See http://maps.massgis.state.ma.us/map_ol/ej.php
- Only site plan is required with the application
- Please use this application for projects consisting of 5 or fewer Level 2 dual-port EV charging stations or 10 or fewer single-port EV charging stations
- Rebates limited to actual cost of installation and equipment

► Customer Requirements

- EV charging station chosen from eligible list on website, www.ngrid.com/ma-evcharging
- Customer responsible for installing, owning, and maintaining the charging stations for at least 5 years
- Customer pays electricity, network fees, and maintenance fees for at least 5 years
- Charging station usage shared with National Grid
- Project documentation, such as installation and equipment invoices, provided after installation

Please check with your National Grid Sales Rep as rebates are subject to change and additional offers may be available!
