

No-Cost Home Energy Assessments

Through Our Income Eligible Program

The first step in reducing your energy bill is to schedule a no-cost Home Energy Assessment with an Energy Specialist. Here are five key things that may be done during the assessment:

1

Install Energy Saving Products

During your assessment, your Energy Specialist will install LED bulbs and other energy saving devices.

ENERGY STAR® certified LED bulbs will last as much as 25 times longer than traditional incandescent bulbs.

2

Test Insulation

If your home needs any attic or wall insulation, the installation will be scheduled for you*.

With a fully insulated home, you could save up to 15% on your energy bill every year.

3

Locate Drafts

If air leaks are detected, your Energy Specialist* will schedule a certified contractor to seal the leaks in your home.

Air sealing can help you lower your heating/cooling bill by up to 15%.

4

Check Appliances & Equipment

If appliances/equipment** are determined to be inefficient, your Energy Specialist* will schedule the replacement of the unit(s).

A new heating system and efficient appliances will reduce maintenance and improve comfort in your home.

5

Walk Through Results & Next Steps

When the assessment is completed, your Energy Specialist will walk you through all energy saving equipment installed during the visit, and recommend additional work to be done by licensed contractors.

The energy assessment process takes around 3 hours.

For more information or to find out if you qualify, call 211 in RI, CLEARResult, 401-351-1800, visit ngrid.com/ri-income or contact your local CAP agency.

THE ENTIRE COST — INCLUDING PRODUCTS, IMPROVEMENTS & INSTALLATION — IS COVERED BY NATIONAL GRID'S INCOME ELIGIBLE PROGRAM AND DELIVERED THROUGH YOUR LOCAL COMMUNITY ACTION AGENCY.

* In certain circumstance this may require an additional visit to your home to assess and/or complete the weatherization and heating system upgrade.

**Inefficient appliances/equipment may include refrigerators, freezers, dehumidifiers, clothes washers, heating systems and air conditioners.

These programs are funded by the energy efficiency charge on all customers' gas and electric bills, in accordance with Rhode Island law.
