

## National Grid Deep Energy Retrofit (DER) Program Participating Contractor and Design Consultant List

National Grid has no contractual relationship and does not guarantee the work of the following contractors and design consultants. Homeowners should use the same level of care in selecting their project team as one would with any home upgrade or maintenance project. The contractors and design consultants have met the National Grid DER measure requirements through their company's previous experience with high performance homes. See "Deep Energy Retrofit Measure Guidelines" for more details. The company selected must have an active role on the jobsite throughout construction.

## National Grid Deep Energy Retrofit (DER) Program Participating Contractor and Design Consultant List

National Grid has no contractual relationship and does not guarantee the work of the following contractors and design consultants. Homeowners should use the same level of care in selecting their project team as one would with any home upgrade or maintenance project. The contractors and design consultants have met the National Grid DER measure requirements through their company's previous experience with high performance homes. See "Deep Energy Retrofit Measure Guidelines" for more details. The company selected must have an active role on the jobsite throughout construction.
